WORK EXPERIENCE

Software Developer   **06/2024 - 06/2025**

WATA TECH, 50 Cuu Long Street, Ward 2, Tan Binh District, Ho Chi Minh

Project Leader – Warehouse Management System

WATA TECH │ Team size: 8
- Led the full lifecycle development of a cross-border warehouse and logistics system supporting Vietnam–Cambodia operations, covering both wholesale-owned and consigned product flows.
- Acted as BA, consultant, and technical owner by gathering requirements, designing system architecture, managing sprints, delegating tasks, reviewing code, and deploying the solution.
- Customized key modules in Odoo 18 Enterprise to handle consignment processes, delivery fee tracking, and multi-warehouse transfers.
- Delivered a scalable logistics solution aligned with cross-border and ownership needs

PROJECT

Pneumonia Detection Web App

Team size: 2 members │ **Role:** Web Developer
- Built a web app to classify pneumonia and localize infected areas from chest X-rays
- Fine-tuned a custom Vision Transformer (ViT) model for accurate medical image analysis
- Developed FastAPIs and Nextjs UI to deliver AI results for doctors
- Reduced diagnostic time by enabling faster, AI-assisted screening

EDUCATION

Bachelor of Engineering, Computer Science   **2021 - 2025**

Industrial University of Ho Chi Minh City, 12 Nguyen Van Bao Street, Ward 1, Go Vap District

- **Specialization:** Artificial Intelligence
- **Relevant coursework:** Deep Learning, Computer Vision, Software Engineering
